I am a Physics fresh graduate from Universitas Pendidikan Indonesia focusing on astronomy and astrophysics who always seeks to expand experience and knowledge. I have a great enthusiasm in data science and analysis for business applications. With a strong background in scientific computing, machine learning, and data analysis I am highly motivated to apply my skills and passion to projects where data-driven insights can make a real impact on business and industrial sectors.

EDUCATION

Universitas Pendidikan Indonesia, Bandung
Bachelor of Science, Physics
GPA 3.75/4.00

Sep 2021 - Aug 2025

EXPERIENCES

Data Analyst Intern

Nov 2025 - May 2026

Ministry of Maritime Affairs and Fisheries (KKP)

- Collected, processed, and analyzed data on ministry's vocational students internship activities to identify and evaluate the suitability of internship locations.
- Developed and implemented an internship activity journal for ministry's vocational students with an automatic weekly reporting system, increasing the efficiency of the performance evaluation process by 75%.
- Compiled analysis results documents to support decision making
- Involved in the discussions regarding the ministry's priority programs.

Outsourcing Research Assistant

Sep 2025 - Oct 2025

Ministry of Energy and Mineral Resources (ESDM)

- Participated in a geoelectrical exploration project to identify new potential hot spring sources in Subang, West Java.
- Collaborated with the research team and ministry staff in preparing and installing the geoelectrical instrument.
- Collected GPS coordinate data of each electrode to map the cable layout path of the geoelectrical survey line.
- Conducted geoelectrical data acquisition and processing using the resistivity method with field instrument and analytical software.

PORTFOLIO PROJECTS

Data Warehousing with PostgreSQL | [Link](#)

- Designed a modern data warehouse using Medallion Architecture: Bronze, Silver, and Gold layer.
- Conducting an ETL process (Extracting, transforming, and loading) data from source systems into the warehouse.
- Developing fact and dimension tables optimized for analytical queries.

Building Deep Learning Model for Gravitational Waves Data | [Link](#)

- Analyzed and processed raw gravitational waves data from Binary Black Hole Systems both in time and frequency domain with Python to extract meaningful features.
- Developed and trained Convolutional Neural Network (CNN) with TensorFlow using simulated waveform signals to estimate the physical properties of a Black Hole.
- Implemented the CNN model on the real gravitational waves data to estimate the key physical parameters with more than 80% accuracy.

ACHIEVEMENTS

- **International Youth Physics Olympiad** Sep 2024
Bronze Medalist
- **National Science Competition** Jun 2024
Silver Medalist in physics
- **National Olympiad in Mathematics and Natural Science** May 2024
Finalist in physics

CERTIFICATIONS

• Udemey - Complete SQL Masterclass	Jun 2026
• Udemey - Complete Microsoft Power BI Bootcamp	Jun 2026
• Pijar Academy - Full Stack Data Analyst Acceleration Class	Jun 2026
• Dicoding - Memulai Pemrograman dengan Python	Jun 2026
• Dicoding - Belajar Dasar AI	Jun 2026
• Dicoding – Belajar Machine Learning Untuk Pemula	Jun 2026
• IBM SkillsBuild - Introduction to Artificial Intelligence	May 2026
• IBM SkillsBuild - Introduction to Generative AI	May 2026
• The Proficiency Test of English to Speakers of Other Languages (PTESOL)	Jul 2025
• Celerates Acceleration Program - Data Science Basics	Jun 2024

LANGUAGES AND SKILLS

Soft Skills

- Problem-solving
 - Critical & Analytical Thinking
 - Communication
- Detail Oriented
 - Teamwork

Hard Skills

- MS Excel
 - PostgreSQL
 - SQLServer
- Pentaho
 - Python
 - NumPy
- Pandas
 - Matplotlib
 - Scikit-Learn
- TensorFlow
 - Power BI
 - Tableau
